

Q.HOME CORE G3

Residential Energy Storage Optimized for Time-of-Use Economics & Third-Party Ownership

Flexible Storage. Accelerated Returns.

Assembled in the U.S. with domestic and non-prohibited foreign entity (non-PFE) content, the Q.HOME CORE G3 residential storage system is built for Third-Party Ownership (TPO), allowing compelling economics for homeowner PPA and lease options.*

Designed for time-of-use savings, our solution delivers efficient production shifting capabilities to take advantage of utility program incentives (e.g. CA NEM 3.0) in a compact, AC coupled architecture—while keeping installation straight-forward and cost-effective for installers. All backed by a trusted, one-stop solutions provider.

*Availability varies by jurisdiction

Includes Domestic Content

Enhances Third-Party Ownership (TPO) economics.

Time-Of-Use Savings

Supports creating time-based discharge profiles, enhancing the financial benefit to homeowners.

Compact & Cost-Effective

Simplified system architecture, reducing parts and cost. (No hub nor breaker relocations needed)

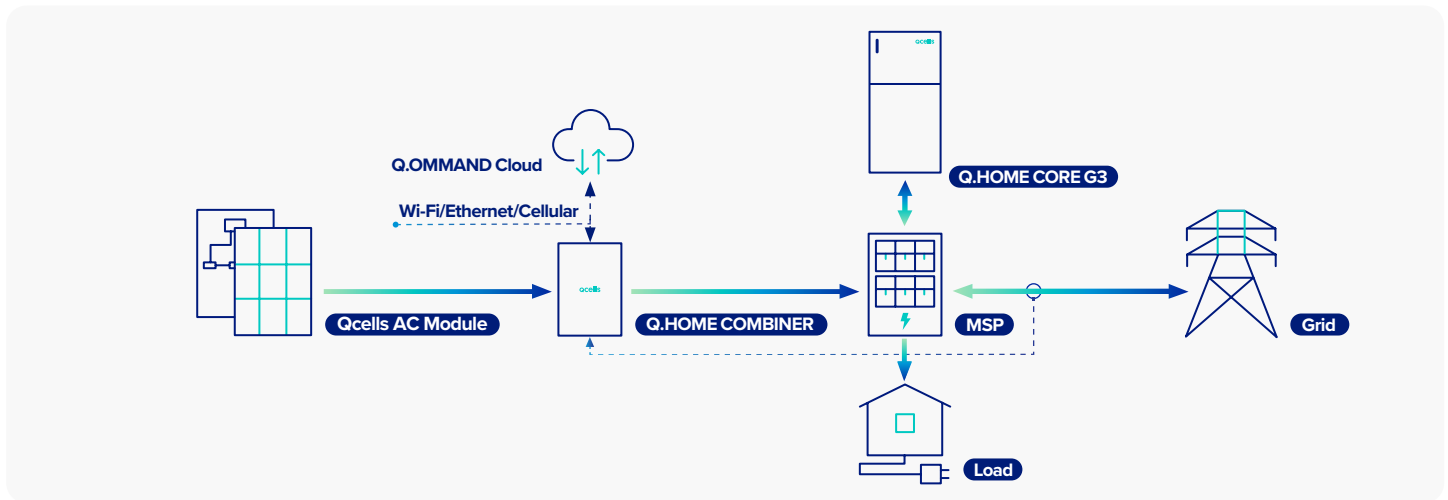

One-Brand, One Warrantor

All backed by Qcells' 15-year (or 68 MWh energy throughput) market-leading warranty.

Q.HOME CORE G3

Grid Support Configuration Architecture

Our standard Grid Support system configuration is designed to facilitate savings from strategic time-of-use (TOU) management, accelerating system ROI while improving installation efficiency. Pair Q.HOME CORE G3 with Qcells AC modules (Q.TRON AC or Q.PEAK DUO AC) for one cohesive solution by a single brand and point of support.

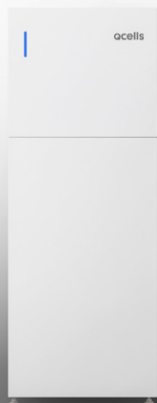

Why Grid Support with Q.HOME CORE G3?

- **Install systems faster** with fewer parts and components
- **Lower system cost** vs. competitor solutions pre-configured with whole-home backup
- **Accelerated ROI** for system owners through TOU utilization
- **Optional Backup Configuration** available with Q.HOME HUB G3, allowing critical loads backup (e.g. refrigerator, lights, internet connectivity)

Financing Flexibility

Give your customers the full spectrum of in-house competitive financing options with EnFin by Qcells.

- **Flexible PPA structures**
- **Competitive lease options**
- **Integrated loan solutions**

Q.HOME CORE G3

Energy Capacity	Power Output	Battery Chemistry
13.1 kWh	7.6 kW	LFP
		<small>Lithium Iron Phosphate</small>
